Subject: Establishment of a pilot project "Young Villagelift"

On behalf of a number of representatives of local associations in the local area Vejle Vesteregn, the local council must hereby urge Vejle Municipality to support the establishment of a pilot project for testing the idea "Young Villagelift".

On April 11, the Vejle Vesteregn council held an information meeting for the local community's associations regarding "Young Villagelift". Representatives of 10 local associations attended the meeting.

At the meeting, Marianne Hansen from the project group presented the ideas about "Young Village Lift" and how a pilot project could be established in Vejle Municipality. The participants showed great interest in the idea and could easily see a similar function for the elderly in the area. The demographics in the area probably shows an overweight of elderly, but at the latest confirmation in Lindeballe Church, there were as many as 10 confirmands.

Therefore, from us here we send a strong appeal about Vejle Municipality to enter into the establishment of a pilot project for testing "Young Villagelift".

At the same time, we call for the project to be extended to enable elder citizens to participate, which, amongst other benefits, can help ensure that more people can stay longer in their own home, in the rural area communities.

Fra deltagerne kom et forslag om at kalde projektet noget i retning af "Landsbylift fra 10-100årige"

From the participants came a proposal to call the project something like "Villagelift for 10-100 year olds"

With kind regards

Anni Assenbjerg

Lokalråd Vejle Vesteregn
